

case study: leaf cloud

MKB LAW

at a glance

What MKB needed

- complete managed service
- modernisation
- infrastructure relocation
- secure home working

Benefits of the solution

- cost effective
- secure
- first class support
- reliable performance
- resilient disaster recovery

"Leaf has provided us with a robust, cost effective and secure IT solution and assisted in modernising our IT operations."

Leaf's support has been first class, with a direct line to an engineer, which has proven invaluable to the day to day running of our business."

Gordon McElroy, Managing Director
MKB Law

Objectives

Leaf partnered with Belfast based law firm MKB Law to deliver a complete managed IT service, hosted in the Leaf Cloud. Their legacy hardware and technologies had become out dated and they needed to transform how they were working with a cloud platform that securely enabled their remote workforce.

The Solution

Leaf carried out a data migration to Office 365 and created a powerful remote environment to ensure that their practice management system was able to perform efficiently while optimising the remote working experience.

With infrastructure located in the Leaf Cloud, it has enabled an always-on, secure and fully remote environment which includes a dedicated hardware fail over solution. In the event of an outage the disaster recovery solution is triggered, providing minimal disruption so that MKB staff can continue to work.

Outcomes

An always-on, remote environment

The modernisation of hardware and implementation of Office365 has enabled an always-on, fully remote environment.

Collaboration capabilities

MKB have new collaboration capabilities, allowing for high levels of productivity - in or out of the office.

Fully supported solution

MKB are fully supported by Leaf's team of highly skilled and accredited engineers,

Modernisation of IT operations

A complete modernisation of IT operations for greater efficiency and cost effective business practices.
